

Languages and Formats

This data was last updated on 01/01/2019.

The HealthReach database contains 762 titles and 61 languages. Every title is translated from English to one or more languages. For each title, the English version and its translations are available in document, audio recording, and/or video formats. There is a unique record for each document, audio recording, and video in each language it is translated.
